

# CORERO SECUREWATCH®

## Managed DDoS Protection Services

### Monitored and Managed by Corero Experts

Whether you are experienced with DDoS protection, or not, Corero's SecureWatch Managed Services let you outsource all, or a portion of your SmartWall deployment to our experts – so you can focus on what you do best.

SecureWatch Managed Services are a comprehensive suite of configuration optimization, monitoring and mitigation response services. This round-the-clock service, delivered by Corero's highly experienced Security Operations Center, is tailored to meet the security policy requirements and business goals of each SmartWall customer that engages in a SecureWatch managed service plan.

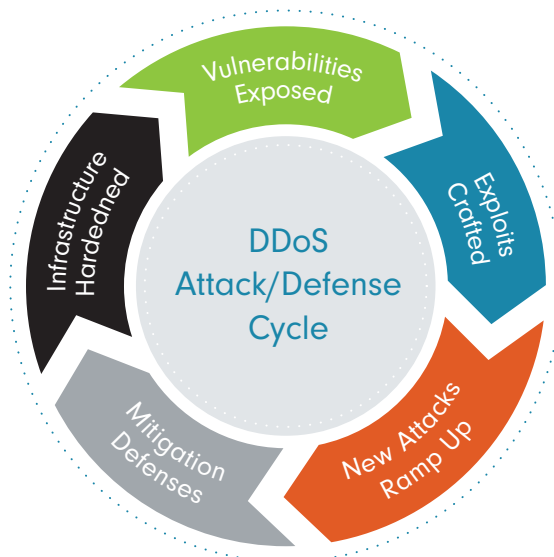

With SecureWatch Managed Services, SmartWall TDS and TDD customers receive expert DDoS services 24 x 7 x 365, starting with an organization-specific implementation, continuing with round-the-clock monitoring, and immediate and effective mitigation and response, in the event of an attack.

### SmartWall® Real-Time DDoS Protection

Corero SmartWall® leads the industry with real-time, automatic, protection that keeps DDoS attacks at bay, without any of the downtime associated with other solutions.

SmartWall uses a patented, innovative and automated, multi-stage detection and mitigation pipeline to ensure the highest possible efficacy. Protection is achieved while maintaining line-rate performance, to ensure legitimate traffic is not impacted by damaging false-positives, or a significant increase in latency.

SecureWatch Managed Service ensures protection is up to date based on the latest DDoS threat intelligence from the SecureWatch team and that all attacks are actively monitored to ensure optimal protection.

#### Real-Time Response

Detection and mitigation in seconds, rather than the minutes or tens of minutes taken by legacy solutions, ensuring online business continuity.

#### Automatic Mitigation

Accurate automatic mitigation delivers lowest TCO and enables your IT and security teams to spend more time defending against other threats.

#### Clear, Actionable Intelligence

Comprehensive visibility with reporting and alerting for clear, actionable, intelligence on the DDoS attack activity across the network.

#### Highly Scalable

Flexible and highly scalable deployment options from the latest infrastructure-based enforcement, to inline and cloud.

## SmartWall SecureWatch® Visibility

### Inbound Traffic

### Block Rate by Attack Vector

For all SmartWall deployments, SecureWatch analytics shows the size, volume and type of packets in each attack, in real-time, with granular visibility into every DDoS vector used, right down to the data in the packets themselves, if needed.

The SecureWatch team uses this to both monitor attacks as they happen, and provide detailed analysis and reporting on each attack.

## SecureWatch Services

Initial Deployment	Standard Installation & Deployment Service
SecureWatch Maintain	Deliver Ongoing Upgrades and Baseline Policy Recommendations
SecureWatch Managed	Full System and Attack Monitoring & Reporting
Introduction Training	Online 2-Hour Introduction to Operation & Configuration Training
Operation Training	2-Day Operation, Configuration and Basic Analytics Training
Analytics Training	1-Day Detailed Analytics Training

## About Corero Network Security

A leader in real-time, high-performance, automatic DDoS protection, on-premises and in the cloud, with comprehensive visibility, analytics and reporting. Enterprises, Service Providers, Hosting & Co-Location Providers, Edge Providers and the MSSP/MSP's across the globe increasingly rely on Corero's award winning DDoS solutions.
