Threat Update Service∗ Advisory
Protection Pack 2016-11-23-01 Released Dec 1st, 2016

Purpose: The Corero Security Active Response Team has issued this Prevention Advisory to protect customers against known attacks targeting the Adobe Flash Player CVE-2015-0350 denial of service vulnerability.

Issue: A Denial of Service Execute Code Memory Vulnerability exists in the Adobe Flash Player. It could allow attackers to execute arbitrary code or cause a denial of service (memory corruption) via unspecified vectors.

Recommended Action: Apply the specified Protection Pack (or any later one) and ensure the associated rule is used to inspect traffic to the affected product infrastructure.

Issue Identifier	CVE-2016-0350
Advisory	https://helpx.adobe.com/security/products/flash-player/apsb15-06.html
Risk Assessment	Critical vulnerability
Threat Impact	Allows attackers to execute arbitrary code via unspecified vectors.
